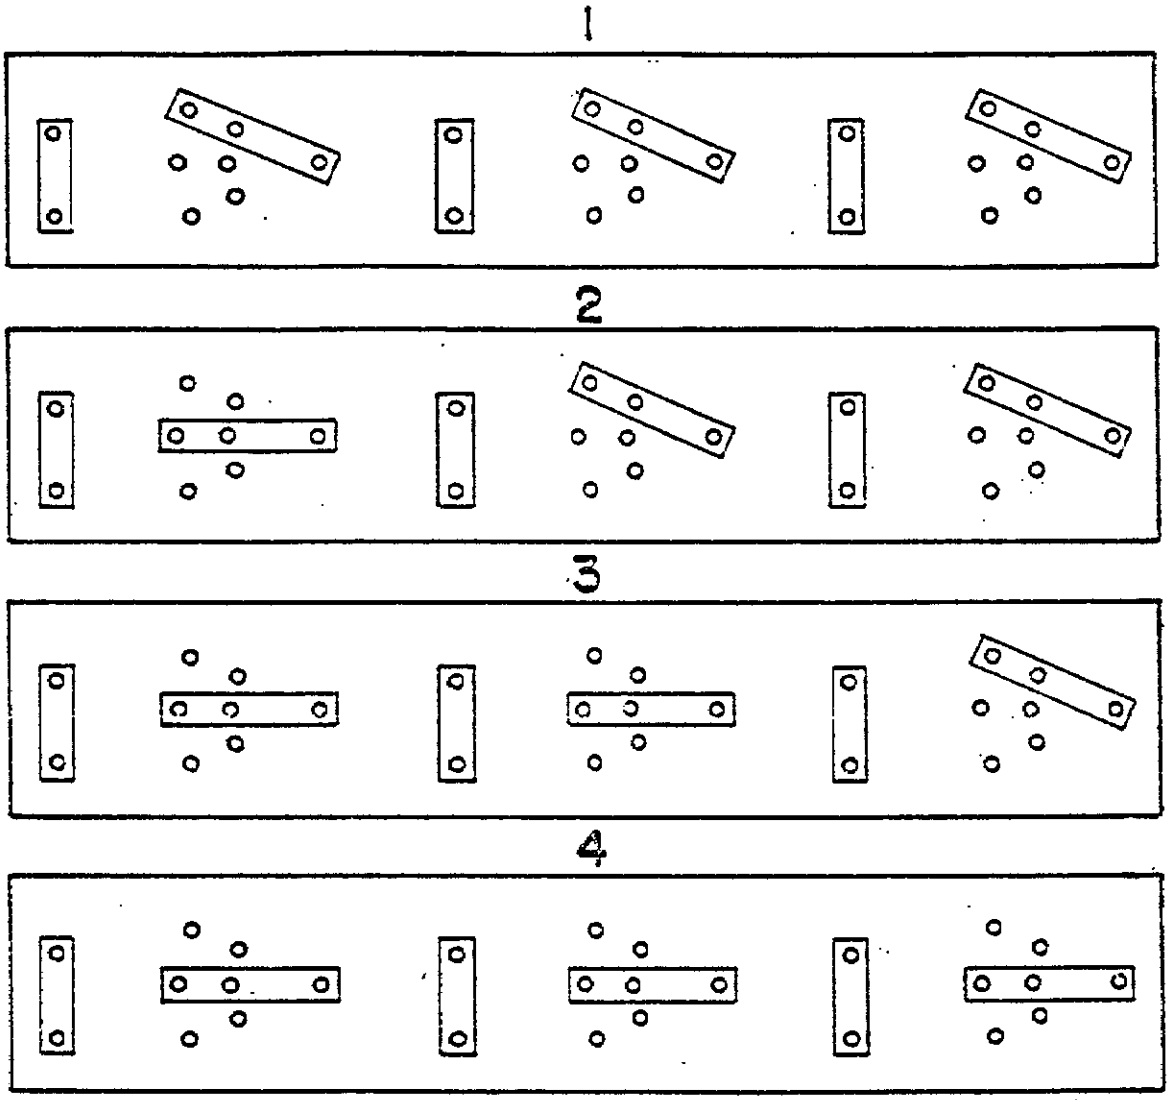
POSITIONS



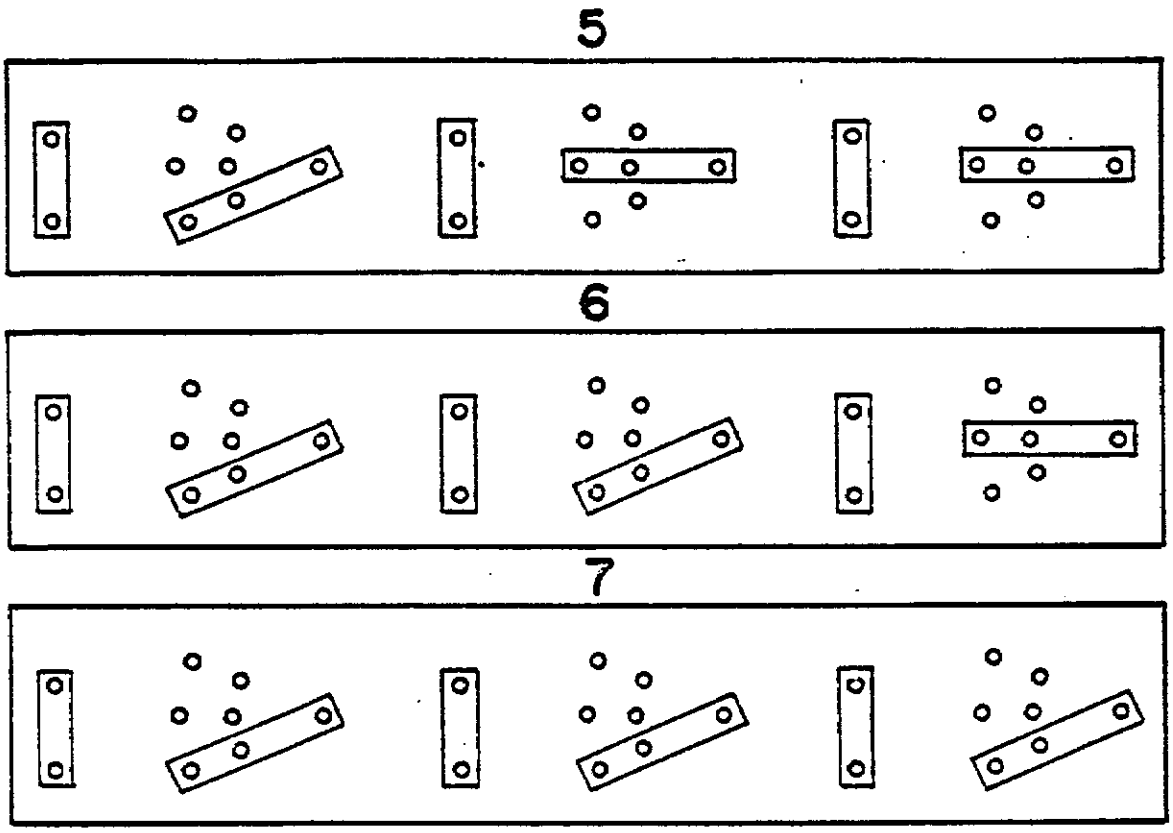
FIRST, find the positon of present terminal board connection.

SECOND, move the jumpers to look like the next diagram

Up to increase the output; Down to decrease the output.

TAP ADJUSTMENT FOR LOW VOLTAGE DUAL VOLTAGE 208/230/240	PREP BY	ISSUED	REV.	NO.	DRAWING NO.
	J.S.	12/15/72			5504

POSITIONS



FIRST, find the position of present terminal board connection.

SECOND, move the jumpers to look like the next diagram

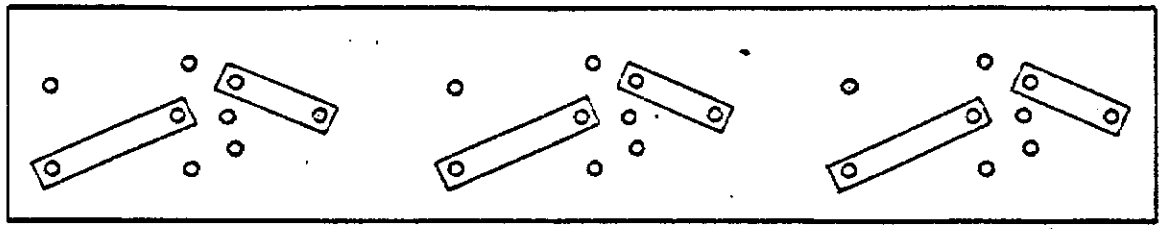
Up to increase the output; Down to decrease the output.

SHEET F2

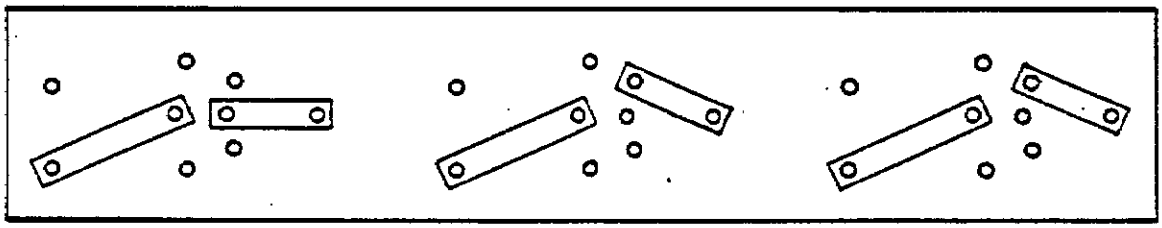
TAP ADJUSTMENT FOR LOW VOLTAGE DUAL VOLTAGE 208/230/240	PREP BY	ISSUED	REV.	NO.	DRAWING NO.
	J.S.	12/15/72			5504

POSITIONS

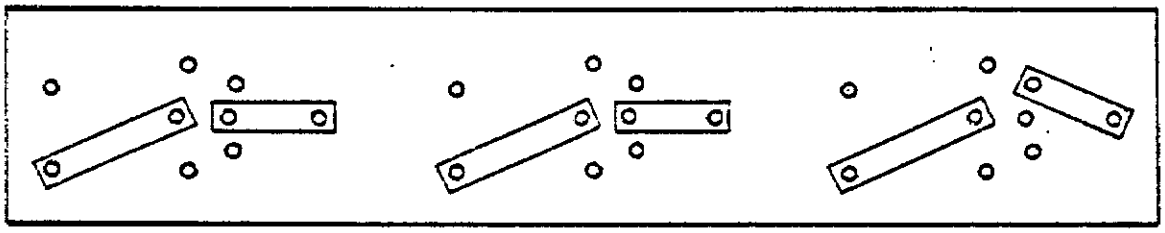
1



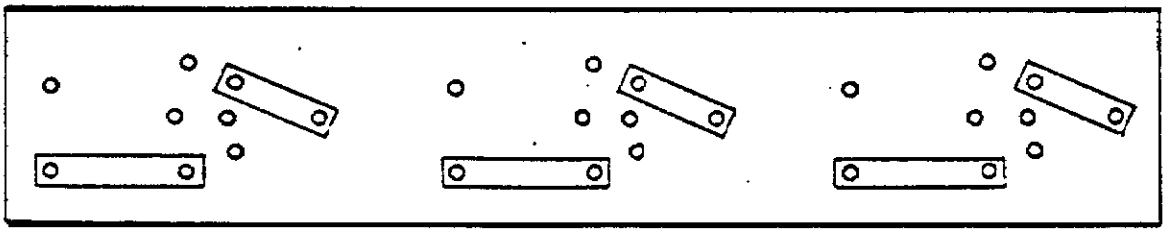
2



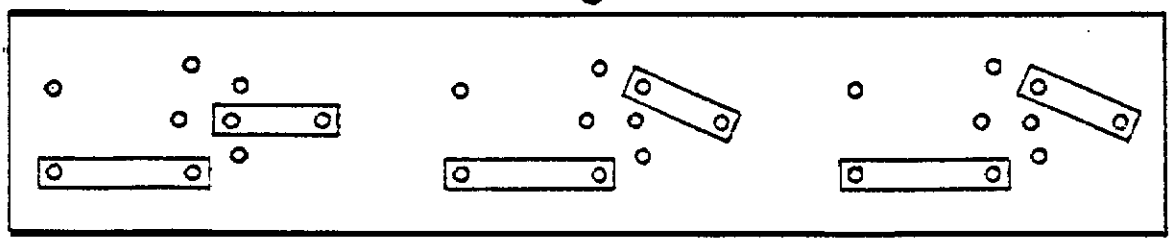
3



4



5



FIRST, find the position of present terminal board connection

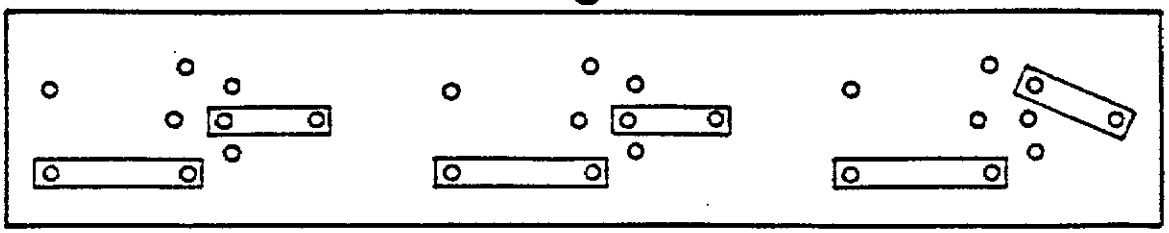
SECOND, move the jumpers to look like the next diagram

Up to increase the output; Down to decrease the output.

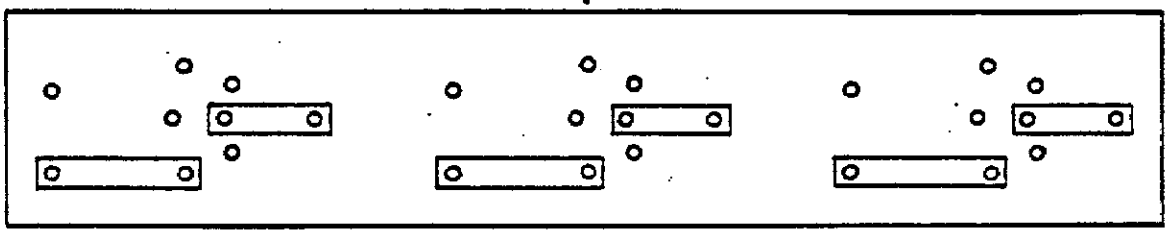
TAP ADJUSTMENT FOR HIGH VOLTAGE DUAL VOLTAGE 440/460/480	PREP BY	ISSUED	REV.	NO.	DRAWING NO.
	J.S.	12/15/72			5505

POSITIONS

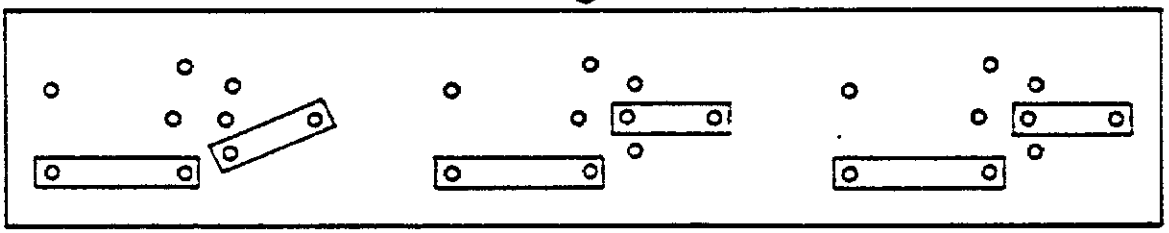
6



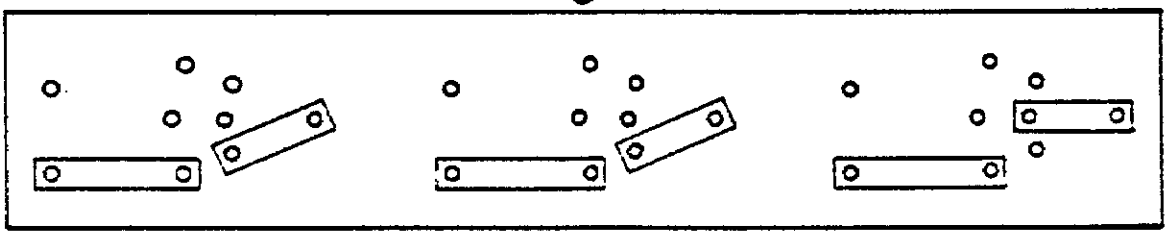
7



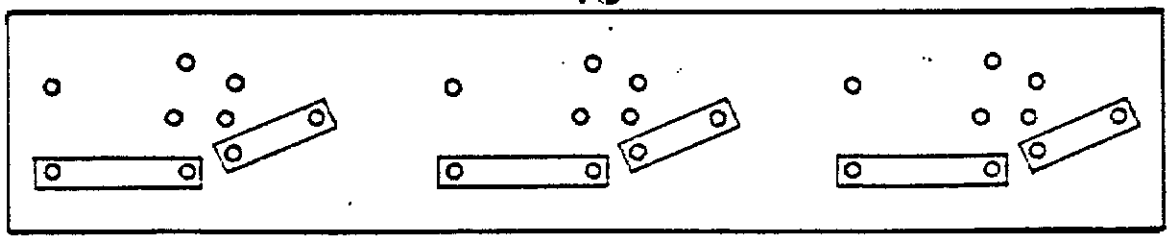
8



9



10



FIRST, find the position of present terminal board connection.

SECOND, move the jumpers to look like the next diagram

Up to increase the output; Down to decrease the output.

SHEET 1 OF 2

TAP ADJUSTMENT FOR HIGH VOLTAGE DUAL VOLTAGE 440/460/480	PREP BY	ISSUED	REV.	NO.	DRAWING NO.
	J.S.	12/15/72			5505
